### SKILLS

#### FRONT-END SKILLS:

- HTML5, CSS3, SASS, Bootstrap, JavaScript (ES6+), Responsive Design.

#### REACT ECOSYSTEM:

- React.js, React Router, React Hooks, Context API, Axios, Form Handling, Component Reusability, State Management

#### MAP & UI INTEGRATIONS:

- Google Maps API, Marker Clustering, Autocomplete (Google Places), Modals, Multi-step Forms.

#### BACKEND KNOWLEDGE:

- Node.js, Express.js (for integration and API testing)

#### DATABASE FAMILIARITY:

- MongoDB (CRUD and API response handling)

### LANGUAGES

- Tamil
- English

### EDUCATION

**Bachelor of Engineering**  
CKCET Cuddalore.  
Jun 2015 – 2019

### PROFILE

Frontend Developer with 2+ years of hands-on experience building dynamic, responsive web applications using **React.js**, **JavaScript**, **HTML5**, and **CSS3**. Proficient in managing application state using **Redux**, and experienced in integrating RESTful APIs. Successfully delivered real estate platforms such

### WORK EXPERIENCE

#### Frontend Developer

##### LEGENDS TECH SOLUTION

JULY 2023 – PRESENT

- Developed and maintained responsive web applications using **React.js**, focusing on performance, scalability, and reusability..
- Implemented **Redux** for efficient and scalable state management across complex components.
- **Pondy Property**: Led the UI development of a real estate platform with Google Maps integration, smart filters, and cluster-based property search for buyers in the Pondicherry region.
- **Rent Property**: Built a rental property interface with dynamic listing cards, filterable options, and intuitive UX for renters and owners.
- Developed a fully functional **Admin Dashboard** with secured OTP login, property status management, and user analytics views.
- Integrated RESTful APIs using **Axios** for data operations and dynamic rendering.
- Integrated **Google Maps API** with:
  - **Search by address with autocomplete** (Google Places Autocomplete).
  - Map marker display based on latitude and longitude coordinates.
  - Live capture and storage of **geolocation data** for each property.
  - Marker clustering for dense location visualization.
- Ensured cross-browser compatibility and responsiveness across devices using **Bootstrap** and custom CSS.
- Collaborated with backend teams (or managed own backend if applicable) to integrate APIs and test data flow.
- Maintained code versioning and collaboration using **Git** and **GitHub**.
- Form validation **Api** intergration.
- Knowledge of frontend build tools and package managers (like., Webpack, npm).
